For extrusion technology broken rice can be used to produce fortified kernels; with coating technology, head rice is required.
FORTIFIED RICE

TERMNOLOGY
Paddy rice: Rice kernels still enclosed in an inedible, protective hull (rough rice)
Head rice: Unbroken grains of milled rice with the hull, bran, and germ removed
Milled rice: Polished rice is the regular-milled white rice. Hull, bran layer and germ have been removed.
Blending: Mixing milled, non-fortified rice with fortified kernels in ratios between 0.5–2% to produce fortified rice.
Fortificant mix: Blend that contains several selected micronutrient (also referred to as premix)
Fortified kernels: fortified rice-shaped kernels containing the fortificant mix (extrusion) or whole rice kernels coated with a fortificant mix (coating)
